Invitation to EMC Seminar

Dear Sir or Madam,

Würth Elektronik and Laboratoria De Nayer Vzw have the pleasure to invite you to our free EMC -seminar on Thursday 17th of April 2008:

“EMC testing for trouble-free electronics development”

EMC can be expensive and a time consuming matter. Filtering and uncoupling versus re-design.

Laboratoria De Nayer and Würth Elektronik will combine their strengths to share experiences on safe electronic designs. Practical examples combined with demonstrations.

EMC safe designs, filtering & uncoupling will give the participant more knowledge in the design steps. We will also pay attention to the financials. What decisions have to be made in relation to EMC and CE compatibility testing?

This seminar is great for R&D engineers and others who are dealing with EMC.

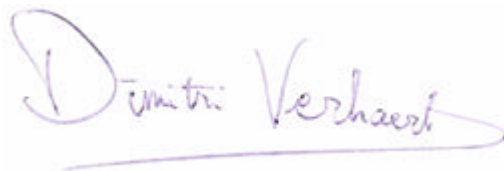

It may happen that you also will receive this invitation through Laboratoria De Nayer.

Because of international guests, the presentations will all be held in English.

Please register on time, the number of registrations is limited.

We are looking forward to your attendance.

With kind regards,

Dimitri Verhaert
Area Sales Manager Belgium & Luxembourg

The program looks a follows

After a short introduction, we will illustrate the aspects of the new EMC directive in practice, as well the rules about CE marking.

8h30 – 9h00	Arrivals & reception	
9h00 – 9h15	Presentation Würth Elektronik eiSos Dimitri Verhaert, Würth Elektronik eiSos	
9h15 – 10h00	Introduction to EMC and generic European normalisation Filip Nauwelaerts, Laboratoria De Nayer	
10h00 – 10h15	Coffee break	
10h15 – 11h05	Selection Method of Ferrites and Inductors Sébastien Chadal, FAE Würth Elektronik eiSos	
11h05 – 11h45	Shielding effectiveness Dirk Van Troyen, Laboratoria De Nayer	
11h45 – 12h20	Varistor selection Sébastien Chadal, FAE Würth Elektronik eiSos	
12h20 – 12h30	Lunch	
13h30 – 14h00	ISO17025 accreditation: What does it mean? Some practical aspects Filip Nauwelaerts, Laboratoria De Nayer	
14h00 – 14h50	Filter Topologies, Simulations & Application for transformer Sébastien Chadal, FAE Würth Elektronik eiSos	
14h50 – 15h00	Questions & Answers	
15h00 – 15h15	Coffee break	
15h15- ...	Demonstration & visit of the lab combined with a drink	

There will be an opportunity on this day to answer customer specific questions interactively.

This is a free seminar; no costs are involved for the visitor.

Seminar location:
Laboratoria De Nayer vzw
Jan De Nayerlaan 5
B-2860 Sint-Katelijne-Waver
Belgium

Please register the following people for the seminar **"EMC testing for trouble-free electronics development"** on Thursday 17th of April 2008.
